PROFESSIONAL PROFILE

Dedicated and results-driven Software Engineer with a proven track record of designing, developing, and deploying robust full-stack applications. Passionate about leveraging technology to create innovative solutions that address real-world challenges. Possess strong problem-solving and collaborative skills, a keen eye for detail, and a commitment to delivering high-quality code.

SKILLS

Programming Languages: Javascript, ReactJS, Typescript, Angular, NextJS, Go, PostgreSQL, Tailwind
Other Technologies: Git/Github, Jira, Docker, Zustand, React Redux, Postman, Github Actions, CI/CD
Operating Systems: Windows, Linux
Other Skills: Analytical thinking, Effective Communication, Leadership, Team Collaboration, Agile development, Tenacity

INTERNSHIPS

Web developer | Mikon Institute of Technology   April 2021 – August 2022

- Developed cutting-edge, responsive user interfaces leveraging modern frameworks like React and Next.js.
- Rapidly adapted to and integrated advanced programming frameworks, driving innovation and staying ahead of industry trends to deliver future-proof solutions.
- Worked closely with backend engineers to architect seamless API integrations, ensuring robust, real-time data flow between PostgreSQL databases and dynamic frontend interfaces.

EMPLOYMENT EXPERIENCE

Frontend Engineer | Bitspend   July 2023- Nov 2024

- Built a NestJS middleware service to efficiently route and sanitize data between frontend and multiple backend services.
- Spearheaded the architecture and development of Bitspend's entire frontend infrastructure using Angular, enhancing application scalability and maintainability.
- Designed and developed reusable UI components aligned with modern design systems, improving development speed by 30%.
- Integrated robust form validation, API handling, and state management across user dashboards, payment modules, and authentication workflows.
- Established a CI/CD deployment pipeline using Bitbucket, enabling automated testing and deployment to staging and production environments.
- Collaborated cross-functionally with product designers and backend engineers to deliver features in agile sprints.

PROJECTS

- Ovistake - A stacking platform built using Typscript, NextJs, Zustand, Framer motion and Vanilla Extract
- MoodMatch - An AI music playlist recommendation that is tailored to the users current mood and can be saved into his/her Spotify account
- Appdule - An appointment booking application built with NextJS, Typescript, Tailwind and Redux for state management
- Connekt - A platform for connecting job seekers to employers looking to hire. Built with Go(Golang).

CERTIFICATIONS

- [Python for Data Science and AI Development](#)
- [Introduction to Devops Engineering](#)

EDUCATION

University of Benin | Benin City, Nigeria   **2017 - 2022**
Bachelor of Science |Computer Science
